VOSA OS

The asynchronous hotel engine

A quieter night. A clearer morning handoff.

Voice-first shift capture

Staff record requests and share structured handoffs.

Routine requests, routed quietly

Explore a fictional Level 1 towels request in the demo.

Priority exceptions stay visible

A sample water leak triggers a Level 2 manager alert.

Your morning, in 30 seconds

Listen to a sample night audit digest with a transcript.

Privacy-conscious summaries

Preview redaction of names and room identifiers.

Live workspaces stay protected

Staff and manager access follow existing hotel verification.

Presentation examples only.

Not measured outcomes or compliance guarantees. Fictional demonstration content.
